

FIND SULPHIDES IN THE BUCKEYE

Rich Copper Deposit Uncovered in Water Canyon, Owned by El Pasoans.

News from Magdalena, N. M., received in El Paso said that at a depth of 150 feet in the new shaft of the Buckeye Copper company, in Water Canyon, about ten miles east of Magdalena, a body of rich copper sulphides has been uncovered that will warrant continuous shipments, with substantial profits.

The Buckeye company is controlled by El Paso men, among them being Henry C. Frost, designer of a number of the city's largest buildings, V. E. Ware, controller here, and the charge of the sinking of the new shaft.

Mr. Frost was selected president and general manager at the last meeting of the stockholders and the other officers were elected. Mr. Frost said at Magdalena, that the Buckeye would be worked to its capacity and that other prospects nearby would be opened.

Unlucky Investments.—Oklahoma capitalists of Miami, Tulsa and Muskogee are heavily interested in the Buckeye company. William Kemp, vice president, was a mining engineer with the Calumet and Arizona company, and with the Lawrence and Sons of New York for six years. A. A. Hoverson is superintendent, and C. E. Frost, of El Paso, is secretary and treasurer.

From Gold to Copper.—Fayette Jones, formerly mineral inspector of New Mexico, who reported on the mineral belt in Water Canyon in 1907, mentioned that the Buckeye and other properties there had been abandoned on account of water and the prevailing low price of copper and the disappearance of the gold. Mining men who have visited Water Canyon lately said they can readily understand why the district was abandoned by everyone except the miners then, but that the present price of copper makes it a very attractive field. There are several tungsten deposits in the district being opened with profit. It is said that some have been shipped from Water Canyon station by one operator, Billy Meyers.

Near El Paso Mines.—The properties of the Buckeye company, which is a New Mexico corporation, are located in Water Canyon, about four miles south of Kelly, N. M., which was the site of the properties of the Empire Zinc company and the mines of the Ockler Mining & Milling company, which have been in operation for about 20 years. The claims of the Buckeye company are in the southeast extension of the same mineral belt as the Empire and Ockler mines. The shipping point is Water Canyon station, about midway between Socorro and Magdalena on the branch of the Santa Fe railroad, five and three-quarters miles from the shaft of the Buckeye company, over a good wagon road. It is the intention of the Buckeye operators to use motor trucks for hauling ores.

Shipments Very Good.—Two of the claims of the Buckeye property were mined for gold about 15 years ago, and in that operation about 1500 feet of slope and drift were opened. This, together with recent developments, has uncovered rich ore bodies of sulphide ore, ranging from five to ten per cent in copper and from 10 to 15 ounces of silver to the ton, as well as gold values, and 24.5 per cent from 2.5 percent lime and 25 percent sulfur, which is said to make the ore desirable for smelting. A carload shipment sent to the El Paso smelter netted the Buckeye company \$18.16 per ton at Water Canyon.

Also Controls Well Street.—Machinery installed at the Buckeye mines since the present company acquired it includes an oil engine, air compressor with four drills, a steam boiler and an American boiler, steam boiler, pump, ore cars, blacksmith shop, 1,500 gallon water tank, cable and one hundred and water pipe. A headquarters building has also been erected.

The well street group of mines, controlled by the Buckeye Copper company, adjoining, has been a gold producer for 20 years, and is now being developed for copper by the Buckeye company.

COWS IGNORE DAYLIGHT PLAN.—Hinsdale, N. H., June 22.—Farmers here say their cows refuse to adjust themselves to the daylight saving plan. They were in the habit of coming to the barn at a certain time to be milked. Now the farmers have to tramp through the dew, perchance to the end of the pasture, and wake the cows up.

LIFT OFF CORNS. MAGIC! NO PAIN

Drop Freezone on a touchy corn then lift corn off with fingers.

Drop a little Freezone on an aching corn, instantly that corn stops hurting, then you lift it right off. It doesn't hurt. Yes, magic!

Why wait? Your druggist sells a tiny bottle of Freezone for a few cents, sufficient to rid your feet of every hard corn, soft corn, or corn between the toes, and calluses, without soreness or irritation. Freezone is the much talked of discovery of a chemist named—ADV.

Arizona Biggest Copper Producer In United States

The Proposed Wage Law Would Benefit Miners, It Is Declared.

By F. R. MILNER.

Prescott, Ariz., June 22.—Arizona leads the United States in the production of the red metal. The official report shows that it produced in 1917, 719,555,114 pounds of copper, as against 69,847,207 for 1916. The approximate output for the month of May was 76,713,107 pounds, exceeding the April production by approximately 500,000 pounds.

At the present time, Arizona copper production is going on at the rate of \$25,000,000 a year, or nearly one-half of the total for 1918.

New Compensation Law.—One of the most important measures incident to mining in Arizona is that which is to come before the voters this year in the proposed amendment to the state constitution, to provide compensation for workmen injured in hazardous employments, and for their beneficiaries and dependents where death results from such injury.

The plan for state insurance, administered by an industrial board appointed by the governor, and with advice and consent of the senate, providing that the employer shall pay a certain rate of premium on his payroll to the industrial board, and that the injured employee shall be paid directly from this fund. It is optional with the employer to come under the law. If the employer elects to come under the law, it is binding upon an employee who shall elect not to be bound by the law, and serves notice to that effect upon his employer and the board. Any employer who has rejected the law, if his employee is injured under it, may, any time, waive or reconsider such rejection upon notification to his employer and the board.

When They Can Sue.—When injury is due to the accident arising out of or in the course of employment away from the plant of the employer, through the negligence or wrong of another, not in the same employer, recourse to common law by the employee may be elected, instead of compensation.

Any employer and his employee, engaged in nonhazardous work or employment, by their joint election, filed with and approved by the board, may accept the compensation provisions of the law, and the rate of assessment of the employer shall be fixed at one-half of one percent of his total payroll. Employers who do not elect to come under the law shall not, in any suit brought by an employee, be liable for damages for personal injury or death resulting from an accident, or that the injury was caused by the negligence of a fellow employee, or that the employee had assumed the risk attending the occupation which resulted in the injury.

Benefits Are Larger.—All persons (excepting household and domestic servants, and agricultural laborers, or casual employees) working for wages in occupation specified as hazardous, of which over 400 are named in the text of the law, are entitled to compensation. Where the injury causes death, the beneficiary is entitled to the time of the injury for a period of 180 days to the beneficiary, if any, in no case to be less than \$2000 or more than \$1000.

In addition to other compensation, there shall be paid burial expenses of the employee not exceeding \$100. If there be no major dependents 50 percent of the daily wages at the time of the injury for a period of 180 days, not exceeding \$500 or less than \$200. If there be no major dependents 50 percent of the daily wages at the time of the injury for a period of 180 days, not exceeding \$500 or less than \$200.

Benefit For Life.—For an injury producing total disability, compensation shall be paid out of the industrial accident fund to the injured employee semi-monthly, at the rate of 66 2/3 percent of the daily wages at the time of the injury during life. If this shall be the period of such disability.

The semi-monthly payments provided for may be converted in whole or in part, into lump sum payment, not exceeding the estimated value of the present worth of the deferred payments, capitalized at the rate of five percent per annum. Such conversion may only be made upon the written application of the injured workman, his beneficiary, or minor or minor dependents, as the case may be, but the advisability of such conversion shall rest in the discretion of the board.

Law Carefully Compiled.—This law has been compiled after a thorough investigation of every compensation law now in action in the mining states and in Canada, and is said to be the best thing of its kind yet submitted for action to the voters of Arizona.

Consideration of this bill was given during a recent meeting of the Arizona chapter of the American Mining Congress, which met in Prescott on June 11 and 12. Representatives of all of the large and small mining companies of the state were present for this session, as well as a number of members.

Clinch, Peek-a-boo and Jazz Banned in Jackie Hops At Great Lakes
Chicago, June 22.—Those in whose ears rests the social and moral welfare of the Great Lakes Jackie have issued a book of rules to govern the functions and dances he may attend. Among the rules made public here are:

Girls must not wear "peek-a-boo" waists when dancing with Jackie, or low neck gowns. There must be no "jazz" music. The "clinch" is as barred on the dance floor as in the ring. Clutch must stop at 11 o'clock sharp. Girls must be seen in their homes by chaperones.

Pension Claimant Says He Was Reenlisted at 74
London, Eng., June 22.—An extraordinary case came before the Abeyon war pensions committee. The applicant, who was appealing against a decision that the disability for which he was discharged was not attributable to or aggravated by his service in the forces, stated that he had been reenlisted in the R. A. M. C. at the age of 74. He was discharged after five months' service for rheumatism and debility. His first enlistment date from 1914, when he joined the famous 504 at the close of the Indian war.

Eleven Year Old Youth Insists on Joining Navy
Philadelphia, Pa., June 22.—Perhaps the most disappointed boy in the Philadelphia district is 11 year old Rollo Jacobson, of Lansdowne. He made a round of all the recruiting offices in this city and failed to enlist. "I want to go to France," he pleaded. "I am certain you want a drummer boy to go along with the troops." The young patriot made a splendid impression and at the naval reserve recruiting office he was permitted to fill out an application blank. He stated that he was in the sixth grade at school the day after tomorrow, and was a puny baby brother, Marcus, 2 years old.

Luther Burbank And His Spineless Cacti
Philadelphia, Pa., June 22.—Luther Burbank, the famous horticulturist, is said to have discovered a new variety of cactus, which he has named "Spineless Cactus." This cactus is said to be the first of its kind, and is said to be the most valuable of its kind. It is said to be the most valuable of its kind, and is said to be the most valuable of its kind.

Boy Climbs To Perilous Height While Asleep
Mount Carmel, Pa., June 22.—Hearing a voice on the balcony, Harry Lucas made an investigation and was startled to see his ten year old son Harold clinging to the peak of the roof. It was necessary to get a ladder to remove the lad from the building. Young Lucas, a victim of somnambulism, had left his bed, climbed through an open window to the water spouting and pulled himself up to the steep, sloping roof, a feat he would have been unable to accomplish if awake.

Sign For War Savings Stamps On Next Friday

Gov. Appeals To People To Raise \$92,000,000 Quota Of Texas.

Austin, Texas, June 22.—Governor Hobby has issued a proclamation designating Friday, June 27, as war savings day in Texas. Quoting from a similar national proclamation issued by president Wilson, governor Hobby requests all wage earners and taxpayers of the state "to meet at 2 o'clock on the afternoon of that day at the schools houses of their several districts that they then and there may pledge their subscriptions to the purchase of war savings stamps," adding in his own behalf:

"That they may then perform their patriotic duty and pledge themselves to save and invest their savings in accordance with the presidential proclamation, which calls upon the people of Texas to invest during the year the sum of \$92,000,000 in war savings stamps by ceaseless care the beneficiaries of the state's war effort."

"Thereto fall not. The United States treasury department has instructed the names of the persons who shall absent themselves from such meetings shall be listed by the officers of state courts and the list forwarded to the state director of the national war savings committee and thence to Washington. Let no Texas citizen fail to do his duty."

His Wife Goes Home, So Hubby Calls Police
Oklahoma City, Okla., June 22.—Married at 8 o'clock, bride gone at 9 o'clock, the fate of a young Tulsa bridegroom. After leaving the church the couple drove to the home of the bride's mother. The bridegroom had registered. He left the bride in the lobby with these words: "Now you stay here while I go and pack. They will get out by 10 o'clock and stay a few days."

When he returned to the lobby she was gone. Thirty minutes' search followed. Then he thought of the police, as he called in chief Nichols. The chief thought a moment. "Maybe she's out for her mother," he told the distracted bridegroom. Ten minutes later they were in each other's arms.

"I thought he said: 'I'll pack my grip and you go out to your mother-in-law,'" he explained. "I thought he was funny, but supposed he knew his business—I didn't."

Patriotism Is Defence Of Men in Saloon Fight
Kankakee, Ill., June 22.—Patriotism on both sides in the defense in the case of Norman Bowling and Ray Nubbaum in city court here, the former charged with shooting the latter. It all came about when Nubbaum entered a saloon, saying: "I can lick any two pre-femans in the house." Bowling took up the challenge and on getting a beating drew a revolver. He is alleged to have fired three shots, one of the bullets entering Nubbaum's thigh. Self defense is Bowling's plea. He contends persecution because he refused to join the Security league. An organization said to be opposed to conscription.

CHERRY PICKERS HAVE A BIG TIME

El Paso Lads at Mountain Park Get Much Fun Out of Their Efforts.

News from Mountain Park, where a number of El Paso boys are picking cherries, says that they are having a fine time and helping their country by helping to save the crop. Win A. Young, who is in charge of the boys working there, accompanied by Pvt. C. Green, went up last Monday, driving through in a car, to get things ready for the boys. They have practically a new kitchen outfit and feel that they have a pretty fair equipment for the camp.

The following cherry boys arrived on the Tuesday afternoon train: Phil Cordova, Herman Broom, Seiden Parham, Hal Hale, Bill Cade, Charles Greene, William Elliott, Vernon Carey, George Lawrence, Chas. Chas. Hall, Lewis Davis, Feltman, Harris Jones, Donald McIntosh, Ellis Crayner, Harry Pruitt, Goodwin Ellis, Fred Ballinger, John Hale and Charles Stevens. Waldron Hale, Leslie Hale, Norman Hamilton, L. L. Dierksen, an engineer at the smelter, was in charge of the boys on their way from El Paso to Mountain Park.

These boys are camped in the T. M. C. A. camp, and are working on the Cadawader fruit farm. The boys start in their work early in the morning. Phil Cordova and Paul Hale are corporals of the two squads. "Fred," Dierksen, is the assistant in charge. Young, Greene is surely "some camp cook," the letter says. The best L. C. is Leslie Hale and his little brother, Green. The best cherry picker so far is Norman Hamilton, and the best cherry picker was Glen Green. The two best mail carriers are Harry Pruitt and Elliott Stevens.

Most of the boys are having the time of their lives. Wednesday afternoon the entire camp hiked to Box Canyon for a good swim in one of the old fashioned swimming holes, and under a beautiful falls. The boys left on an all day hike to Cloudcroft Friday, inasmuch as it will be weekly hiking because the cherries cannot be sent out today, since they would be over in the express office. They have some interesting boxing bouts of evenings. Thursday night a number of the girls visited the camp and all had a supper, using a little folding organ. Feltman and Billy Cooke proved to be real song birds.

JUNE BRIDE CRISP SMALL.
Boston, Mass., June 22.—June brides are a commonplace scarcity this year. There are fewer than during June of the two previous years by a wide margin. The big rush was last year, when many couples were married previous to the exodus of young men to the war.

Heal Skin Diseases
It is unnecessary for you to suffer with eczema, blotches, ringworm, rashes and similar skin troubles. A little Zemo is obtained at any drug store for 35c, or \$1.00 for extra large bottle, and promptly applied will usually give instant relief from itching torture. It cleanses and soothes the skin and heals quickly and effectively most skin diseases. Zemo is a wonderful, penetrating, disappearing liquid and is soothing to the most delicate skin. It is not greasy, is easily applied and costs little. Get it today and save all further distress. The E. W. Rose Co., Cleveland, O.
